**ISSUE:**

A resolution authorizing an agreement with Salt Lake County Assessor's Office for the use and licensing of the product called Pictometry for viewing aerial photography.

**SYNOPSIS:**

This resolution authorizes the City to enter into an agreement with Salt Lake County Assessor's office, under the existing contract between Salt Lake County Assessor's Office and Pictometry International Corp., to the use and licensing of the product called Pictometry. Under provisions of that contract, jurisdictions within the County are licensed to use the software. The County agrees to license the City to use Pictometry for a period of two years at no cost.

**BACKGROUND:**

Pictometry International Corp. produces a product called Pictometry, which includes a desktop client application and a network server component that serves oblique and orthorectified aerial photography to the desktop client. The software provides a map viewer that allows users to view sides of buildings, view shed angles, and take horizontal and vertical measurements. Existing City GIS data can be overlaid with the aerial photography. More importantly, the orthorectified imagery can be used in GIS Software and with many of the existing GIS applications that have been developed by City GIS Staff.

**RECOMMENDATION:**

City staff recommends the approval of this resolution.
